

Maximize the productivity level and safety of your workers.

Process and production line workers come in all shapes and sizes and elevating them to the proper work heights or raising them out of wet and unsafe floors usually requires a work platform. Traditionally the options were heavy, expensive steel or stainless steel platforms which are often unsafe, cumbersome to move, and difficult to clean. Fibergrate offers a better solution!

Fibergrate provides an array of fiberglass reinforced plastic (FRP) options including Safe-T-Stands, workmats and custom platform solutions. Safe-T-Stands are available in heights from 2" to 10" and provide a solid elevated work platform with a non-slip surface. Or by utilizing molded grating and grating rubber feet, any size workmat can be created. The feet raise the grating 1/2" above the ground and the open mesh allows chips and fluids to fall below the standing surface providing a safe, clean working area. Should your operations require more complex work stations, Fibergrate's turnkey approach includes design, fabrication and installation services for everything from a simple portable station to larger fixed platforms with handrail and stairways.

FRP platforms provide additional benefits that will increase worker comfort as they move from concrete floors or traditional steel platforms to Fibergrate grating. All platforms have a slip-resistant surface that will ensure workers avoid costly slips and falls even when their work area is wet. In addition, workers will notice the difference in the ergonomically resilient work surface that eases the strain on feet, legs and back muscles by actually cushioning worker movement. Fibergrate work platforms are easy-to-clean and transport which can save time during shift changes. All work platforms can be manufactured using our exclusive FGI-AM resin, a state-of-the-art, USDA acceptable, food-grade resin that protects the surface of the product from microbial growth. Put Fibergrate to work on your line where height adjustment and increased comfort will make your workers more productive.

Safe-T-Stand[®]

Safe-T-Stand platforms have a grit top which provides a solid, safe and slip-resistant surface, while their

resilient design eases the strain on feet, legs and back muscles. Stands are available in 2", 4", 6", 8" and 10" heights and have skid-resistant rubber feet for added safety. The stands are easily cleaned and moved.

The proven strength, impact resistance and overall durability of FRP construction make Safe-T-Stand platforms equally usable in any process industry or manufacturing environment.

Now with Slip Resistant Rubber Feet

Work Surface (A)	Height (B)	Base (C)	Weight (lbs)
18" x 24"	2"	18-1/2" x 24-1/2"	10
18" x 24"	4"	19-1/2" x 25-1/2"	14
18" x 24"	6"	20-1/2" x 26-1/2"	18
18" x 24"	8"	21-1/2" x 27-1/2"	22
18" x 24"	10"	22-1/2" x 28-1/2"	26
24" x 24"	2"	24-1/2" x 24-1/2"	15
24" x 24"	4"	25-1/2" x 25-1/2"	17
24" x 24"	6"	26-1/2" x 26-1/2"	21
24" x 24"	8"	27-1/2" x 27-1/2"	27
24" x 24"	10"	28-1/2" x 28-1/2"	33
36" x 24"	2"	36-1/2" x 24-1/2"	18
36" x 24"	4"	37-1/2" x 25-1/2"	24
36" x 24"	6"	38-1/2" x 26-1/2"	30
36" x 24"	8"	39-1/2" x 27-1/2"	37
36" x 24"	10"	40-1/2" x 28-1/2"	45

Workmats

Specially designed rubber feet with molded grating are an economical way to create a raised, ergonomic grating workmat for use around machines, lathes and in wet areas. With the rubber feet, facilities have a cost effective solution to elevate grating needed for drainage or water flow. The feet can be utilized on all depths of molded grating from 1", 1-1/2" and 2" in any shape or configuration. The workmats can also be customized

to worker resiliency preferences, just add more feet to increase the stiffness. The feet raise the grating 1/2" above the ground and with the open mesh, workers are safer when chips and fluids fall below the standing surface and eliminate slip and fall hazards.

Custom Platform Solutions

Fibergrate's turnkey approach to providing custom platform solutions include design, fabrication and installation services. Fibergrate custom platforms can be designed to meet the unique requirements found within the various manufacturing sectors. Custom designed platforms can include stairs, handrails ladders and even the structure for the entire platform. For more than 35 years, Fibergrate has manufactured everything from simple portable workstations to multifaceted platforms and our experienced personnel can provide your facility with the perfect custom platform solution.
